Analysis of Feedback by Students (2022-23)

Internal Quality Assurance Cell

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

According to 8.8 % students consider Syllabus and curriculum is need based, relevant and has potential to be in present situation is excellent.

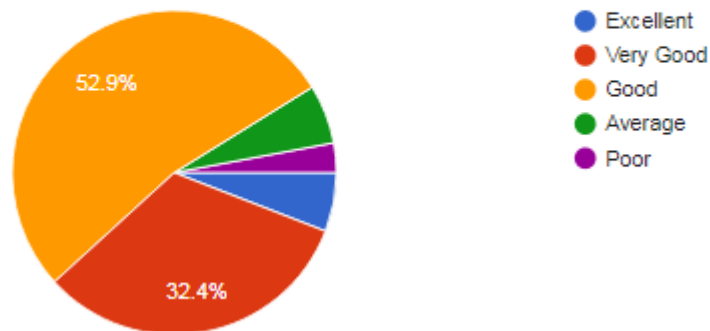

According to 26.5 % students consider Syllabus and curriculum is need based, relevant and has potential to be in present situation is very good.

According to 50 % students consider Syllabus and curriculum is need based, relevant and has potential to be in present situation is good.

According to 8.8 % students consider Syllabus and curriculum is need based , relevant and has potential to be in present situation is average.

According to 5.8 % students consider Syllabus and curriculum is need based , relevant and has potential to be in present situation is poor.

2. Coverage of curricula and syllabi within time frame

According to 8 % students consider Coverage of curricula and syllabi within time frame excellent.

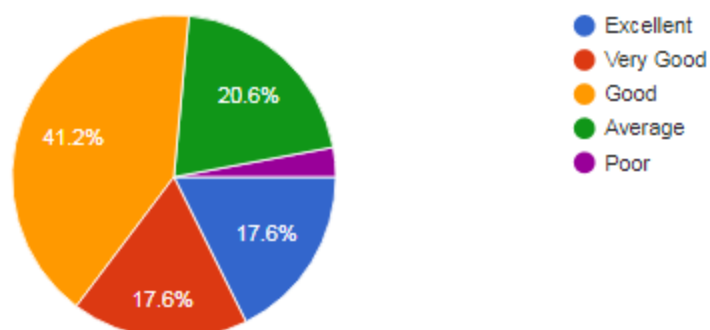

According to 32.4 % students consider Coverage of curricula and syllabi within time frame very good.

According to 52.9 % students consider Coverage of curricula and syllabi within time frame good.

According to 7 % students consider Coverage of curricula and syllabi within time frame average.

According to 2 % students consider Coverage of curricula and syllabi within time frame poor.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

According to 17.6 % students consider effective use of teaching aids by teachers while teaching excellent.

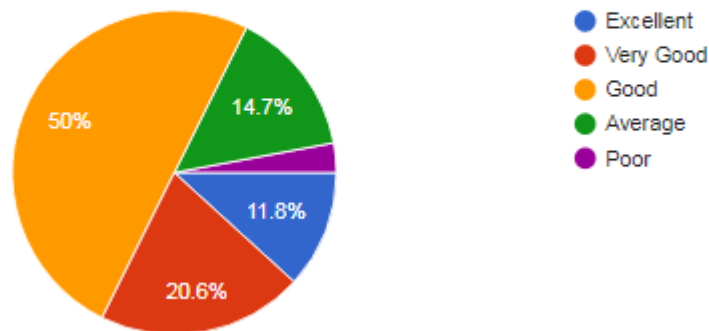

According to 17.6 % students consider effective use of teaching aids by teachers while teaching very good.

According to 41.2 % students consider effective use of teaching aids by teachers while teaching good.

According to 20.6 % students consider effective use of teaching aids by teachers while teaching average.

According to 2 % students consider effective use of teaching aids by teachers while teaching poor.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

According to 11.8 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning excellent.

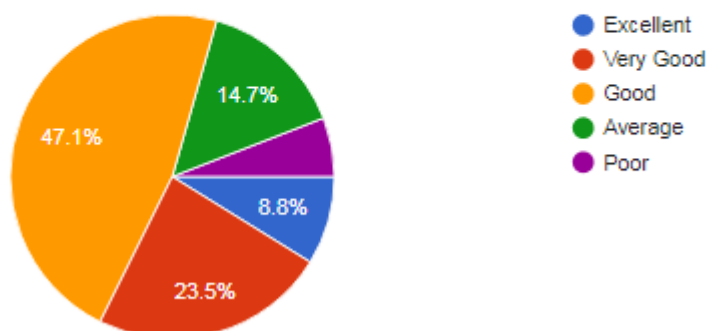

According to 20.6 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning very good.

According to 50 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning good.

According to 14.7 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning average.

According to 2.9 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning poor.

5. Integration of additional lectures or trainings in addition to regular curriculum (like current issues, professional development, interdepartmental activities etc.) beneficial for academic, professional, social and personal development.

According to 8.8 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development excellent.

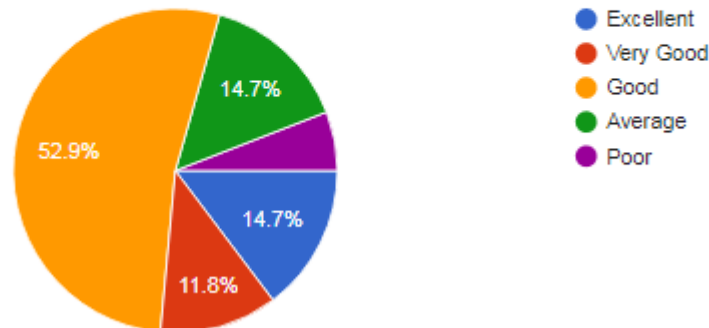

According to 23.5 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development very good.

According to 47.1 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development good.

According to 14.7 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development average.

According to 6 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development poor.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

According to 14.7 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc excellent.

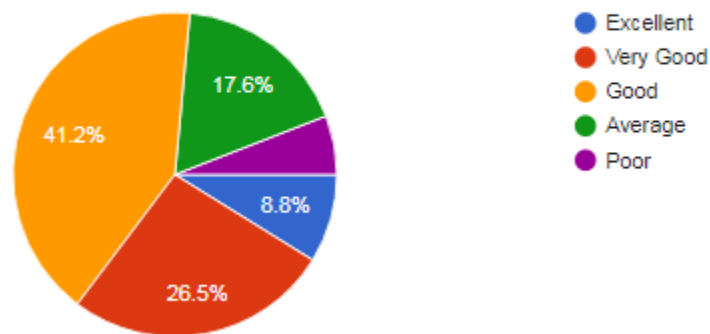

According to 11.8 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc very good.

According to 52.9 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc good.

According to 14.7 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc average.

According to 5 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc poor.

7. The satisfaction about fairness in internal evaluation process.

According to 8.8 % students consider the satisfaction about fairness in internal evaluation process excellent.

According to 26.5 % students consider the satisfaction about fairness in internal evaluation process very good.

According to 41.2 % students consider the satisfaction about fairness in internal evaluation process good.

According to 17.6 % students consider the satisfaction about fairness in internal evaluation process average.

According to 5 % students consider the satisfaction about fairness in internal evaluation process poor8

8. Actionable Suggestions Received

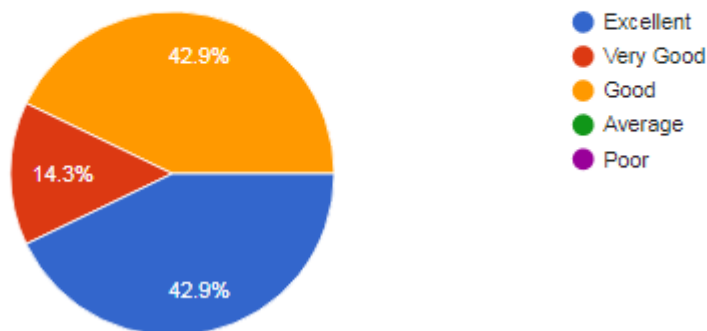

1. Newer technologies should be taught and allowed to use.
2. Lack of time for self study.
3. Teachers should make class more interactive
4. Lectures should be interactive.

Analysis of Feedback by Teachers (2022-23)

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

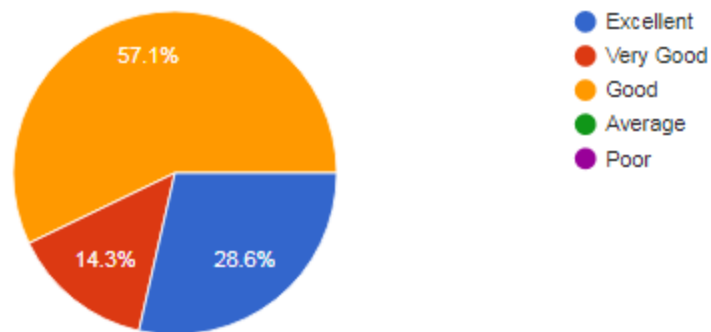

According to 42.9 % teachers consider syllabus and curriculum is need based , relevant and has potential to be in present situation excellent.

According to 14.3 % teachers consider syllabus and curriculum is need based , relevant and has potential to be in present situation very good.

According to 42.9 % teachers consider syllabus and curriculum is need based , relevant and has potential to be in present situation good.

2. Coverage of curricula and syllabi within time frame

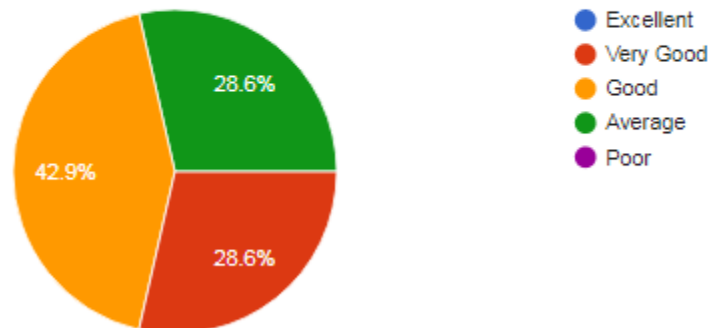

According to 28.6 % teachers consider coverage of curricula and syllabi within frame excellent.

According to 14.3 % teachers consider coverage of curricula and syllabi within frame very good.

According to 57.1 % teachers consider coverage of curricula and syllabi within frame good.

3. Opportunities for Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

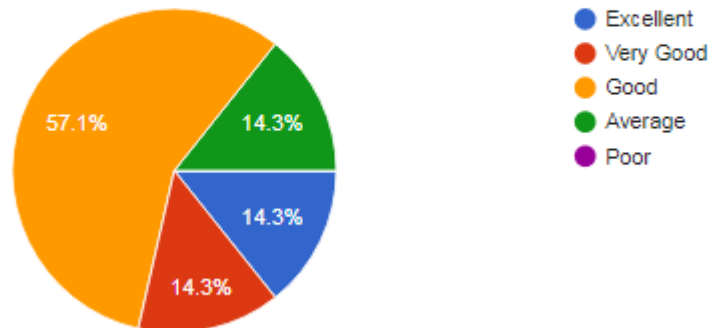

According to 28.6 % teachers consider effective use of teaching aids by teachers while very good.

According to 42.9 % teachers consider effective use of teaching aids by teachers while good.

According to 28.6 % teachers consider effective use of teaching aids by teachers while average.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

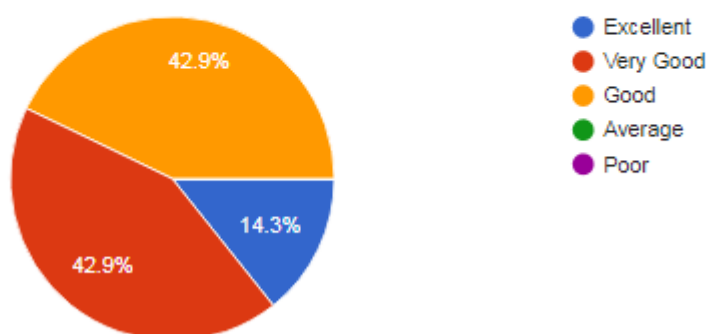

According to 14.3 % teachers consider effective use of academic , clinical &practical facilities available in the institution for better learning excellent.

According to 14.3 % teachers consider effective use of academic , clinical &practical facilities available in the institution for better learning excellent.

According to 57.1 % teachers consider effective use of academic , clinical &practical facilities available in the institution for better learning excellent.

According to 14.3 % teachers consider effective use of academic , clinical &practical facilities available in the institution for better learning excellent.

5. Integration of additional lectures or trainings in addition to regular curriculum (like current issues, professional development, interdepartmental etc.) beneficial for academic, professional, social and personal development.

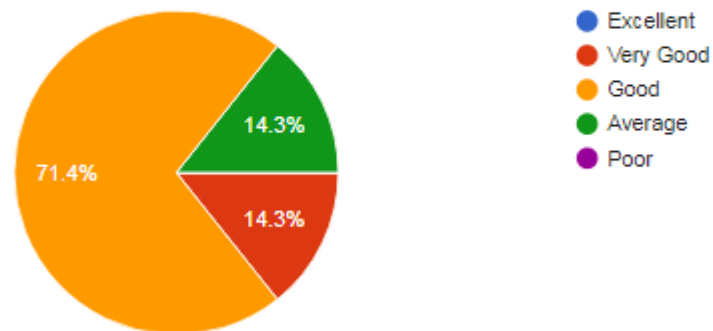

According to 14.3 % teachers consider Integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development excellent.

According to 42.9 % teachers consider Integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development very good.

According to 42.9 % teachers consider Integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development good.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

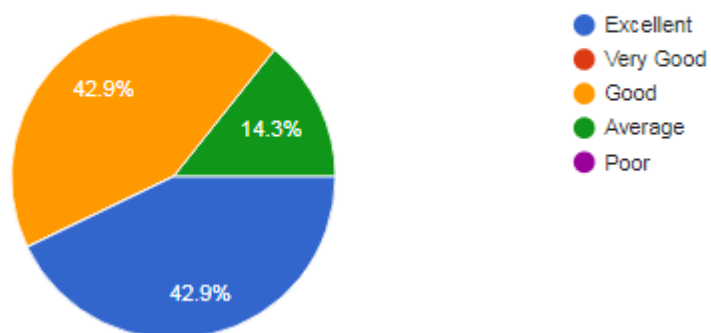

According to 14.3 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc very good.

According to 71.4 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc good.

According to 14.3 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc average.

7. Effectiveness of your teaching experience process.

According to 42.9 % teachers consider effectiveness of teaching experience process excellent.

According to 42.9 % teachers consider effectiveness of teaching experience process good.

According to 14.3 % teachers consider effectiveness of teaching experience process average.

8 Actionable Suggestions Received

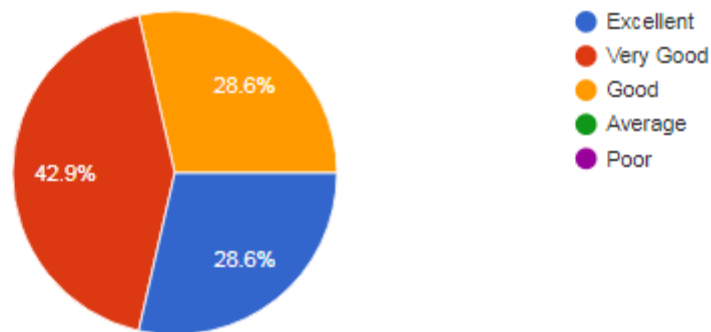

1. Senior staffs should be involved in the process of curriculum setting.
2. More practical based and advanced methods of clinical practices should be promoted.
3. Elaborative assessment and evaluation is needed

Mahatma Gandhi Vidyamandir's

Analysis of Feedback by Alumni (2022-23)

1. New ideas and knowledge promoted in the institute

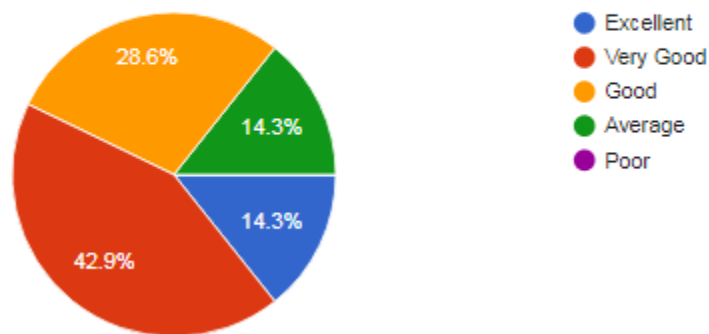

According to 28.6 % alumni consider new ideas and knowledge promoted in the institute excellent.

According to 42.6 % alumni consider new ideas and knowledge promoted in the institute very good.

According to 28.6 % alumni consider new ideas and knowledge promoted in the institute good.

2. Inclusion of contemporary techniques and sciences in teaching & learning

According to 14.3 % alumni consider inclusion of contemporary techniques and sciences in teaching and learning excellent.

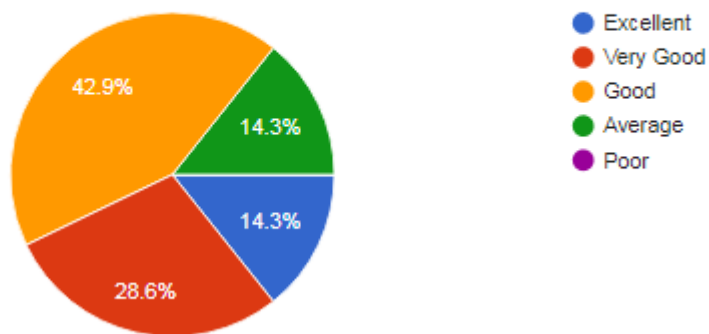

According to 42.9 % alumni consider inclusion of contemporary techniques and sciences in teaching and learning very good.

According to 28.6 % alumni consider inclusion of contemporary techniques and sciences in teaching and learning good.

According to 14.3 % alumni consider inclusion of contemporary techniques and sciences in teaching and learning average.

According to 0 % alumni consider inclusion of contemporary techniques and sciences in teaching and learning poor.

3. Relevance of syllabus and curriculum in current clinical field

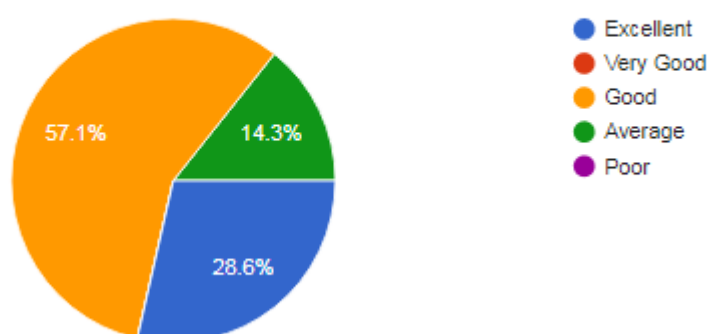

According to 14.3 % alumni consider relevance of syllabus and curriculum in current clinical field excellent.

According to 28.6 % alumni consider relevance of syllabus and curriculum in current clinical field very good.

According to 42.9 % alumni consider relevance of syllabus and curriculum in current clinical field good.

According to 14.3 % alumni consider relevance of syllabus and curriculum in current clinical field average.

4. Role of curriculum in developing Diagnostic skills and clinical decision making

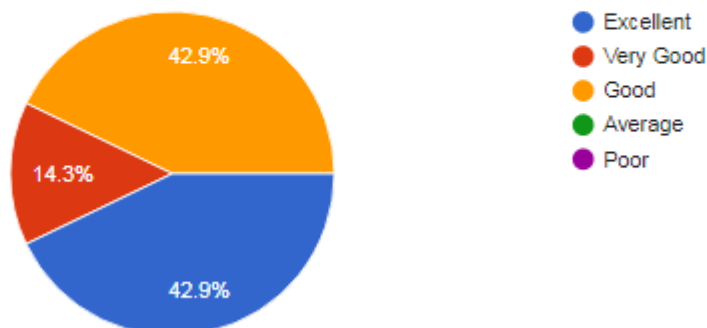

According to 28.6 % alumni consider role of curriculum in developing diagnostic skills and clinical decision making excellent.

According to 51.7 % alumni consider role of curriculum in developing diagnostic skills and clinical decision making good.

According to 14.3 % alumni consider role of curriculum in developing diagnostic skills and clinical decision making average.

5. Development of allied skills for communication, integrity, ability to work as team etc.

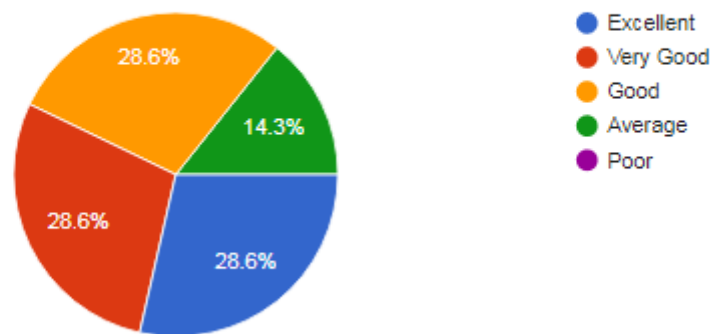

According to 42.9 % alumni consider development of allied skills for communication, integrity, ability to work as team etc. excellent.

According to 14.3 % alumni consider development of allied skills for communication, integrity, ability to work as team etc. very good.

According to 42.9 % alumni consider development of allied skills for communication, integrity, ability to work as team etc. good.

6. Nurturing multidisciplinary approach and Response to emergency handling

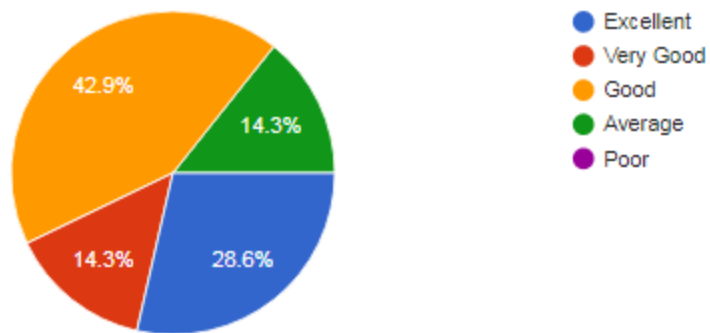

According to 28.6 % alumni consider nurturing multidisciplinary approach and response to emergency handling excellent.

According to 28.6 % alumni consider nurturing multidisciplinary approach and response to emergency handling very good.

According to 28.6 % alumni consider nurturing multidisciplinary approach and response to emergency handling good.

According to 14.3 % alumni consider nurturing multidisciplinary approach and response to emergency handling average.

7. Effective training mounting into research potential

According to 28.6 % alumni consider effective training mounting into research potential excellent.

According to 14.3 % alumni consider effective training mounting into research potential very good.

According to 42.9 % alumni consider effective training mounting into research potential good.

According to 14.3 % alumni consider effective training mounting into research potential average.

8 Actionable Suggestions Received

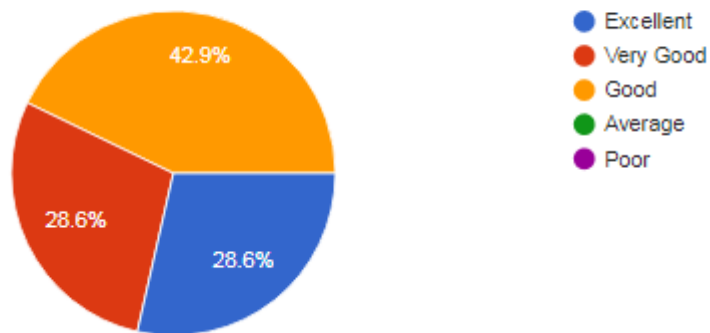

1. Clinical case based discussion should be conducted in clinics before starting the patients
2. Some practical based topics or practical situation based topics should be taken.
3. Case presentations should be encouraged

Analysis of Feedback by Students (2021-22)

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

According to 17.6 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation excellent.

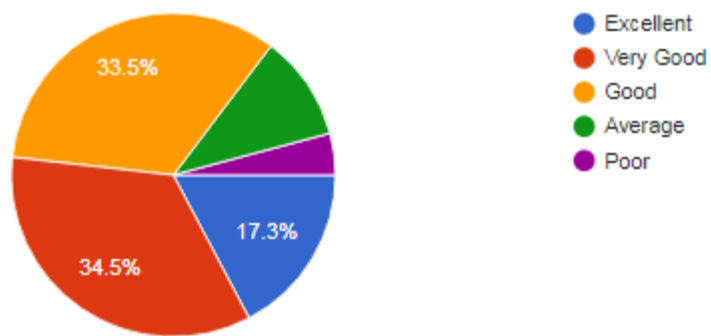

According to 37.8 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation very good.

According to 34 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation good.

According to 9.3 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation average.

According to 1 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation poor.

2. Coverage of curricula and syllabi within time frame

According to 17.3 % students consider coverage of curricula and syllabi within time frame excellent.

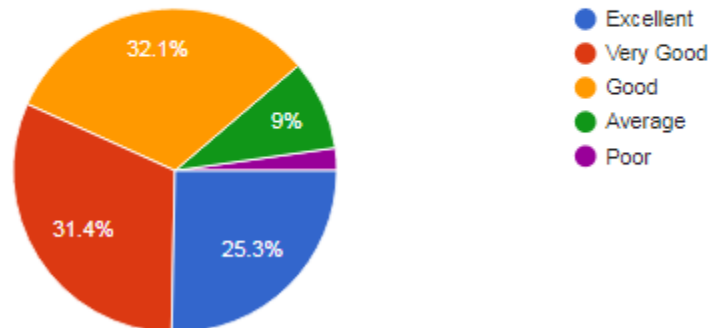

According to 34.5 % students consider coverage of curricula and syllabi within time frame very good.

According to 33.5 % students consider coverage of curricula and syllabi within time frame good.

According to 10 % students consider coverage of curricula and syllabi within time frame average.

According to 4 % students consider coverage of curricula and syllabi within time frame poor.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

According to 25.3 % students consider effective use of teaching aids by teachers while teaching excellent.

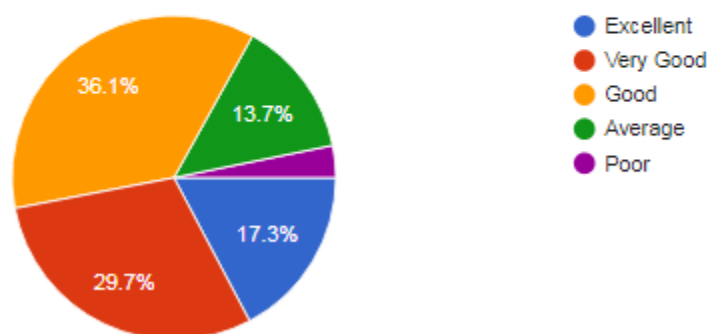

According to 31.4 % students consider effective use of teaching aids by teachers while teaching very good.

According to 32.1 % students consider effective use of teaching aids by teachers while teaching good.

According to 9 % students consider effective use of teaching aids by teachers while teaching average.

According to 2 % students consider effective use of teaching aids by teachers while teaching poor.

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

According to 17.3 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development excellent.

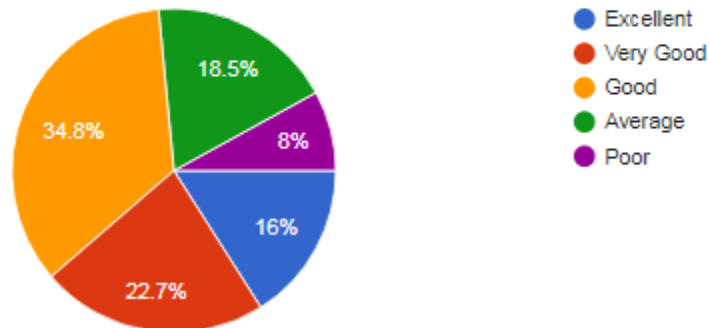

According to 29.7 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development very good.

According to 36.1 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development good.

According to 13.7 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development average.

According to 3 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development poor.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

According 16 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc excellent.

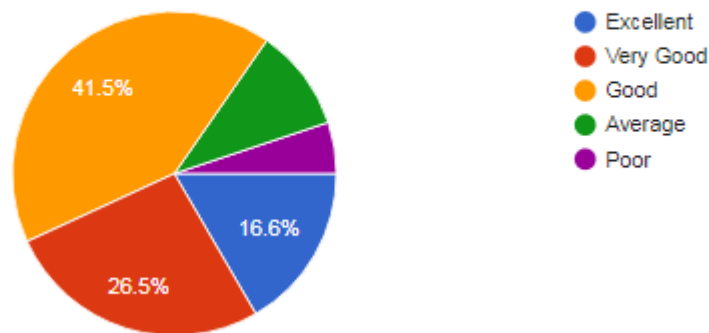

According 22.7 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc very good.

According 34.8 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc good.

According 18.5 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc average.

According 8 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc poor.

7. The satisfaction about fairness in internal evaluation process.

According 16.6 % students consider the satisfaction about fairness in internal evaluation process excellent.

According 26.5 % students consider the satisfaction about fairness in internal evaluation process very good.

According 41.5 % students consider the satisfaction about fairness in internal evaluation process good.

According 9 % students consider the satisfaction about fairness in internal evaluation process average.

According 7 % students consider the satisfaction about fairness in internal evaluation process poor.

8 Actionable Suggestions Received

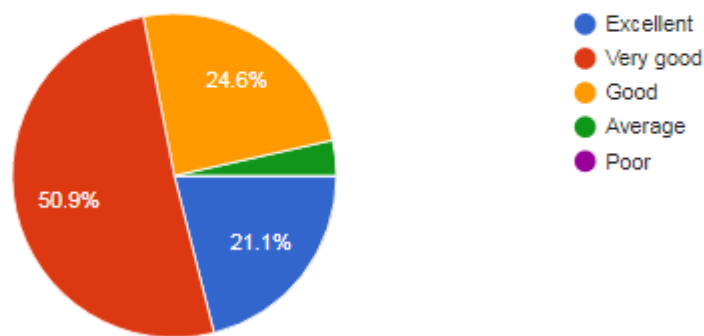

1. Do invite more alumni to have interactive session for guidance.
2. Classrooms should be better equipped with teaching aids and lectures should be interactive
3. Some classes run very fast which makes it difficult for us to understand.

Analysis of Feedback by Students (2020-21)

Academic Year of the student

1. Syllabus and curriculum is need based, relevant and has potential to be applied in present situation

5

According 13.8 % students consider Syllabus and curriculum is need based , relevant and has potential to be in current situation excellent.

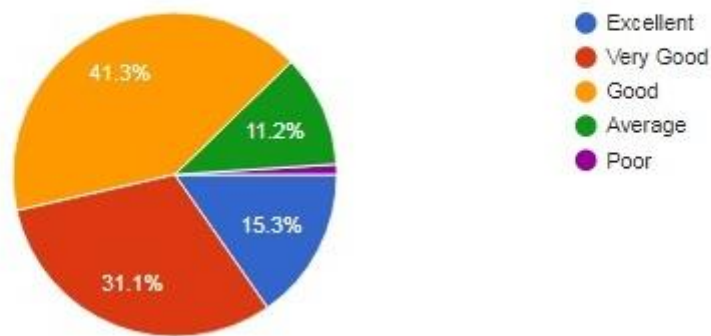

According 26.7 students consider Syllabus and curriculum is need based , relevant and has potential to be in current situation very good.

According 46.2 % students consider Syllabus and curriculum is need based , relevant and has potential to be in current situation good.

According 12.3 % students consider Syllabus and curriculum is need based , relevant and has potential to be in current situation average.

According 2 % students consider Syllabus and curriculum is need based , relevant and has potential to be in current situation poor.

2. Coverage of curricula and syllabi within time frame

According 15.3 % students consider coverage of curricula and syllabi within time frame excellent.

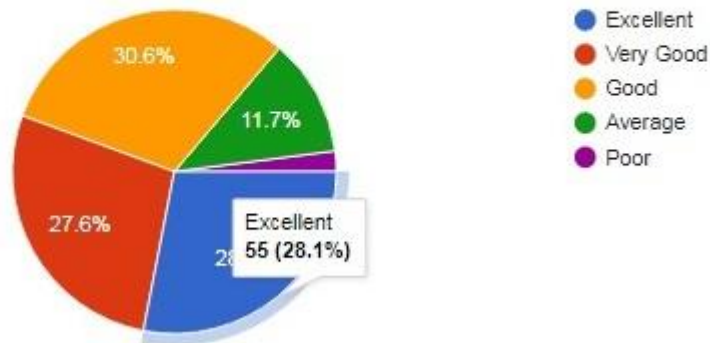

According 31.1 % students consider coverage of curricula and syllabi within time frame very good.

According 41.3 % students consider coverage of curricula and syllabi within time frame good.

According 11.2 % students consider coverage of curricula and syllabi within time frame average.

According 2 % students consider coverage of curricula and syllabi within time frame poor.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

According 28.1 % students consider effective use of teaching aids by teachers while teaching excellent.

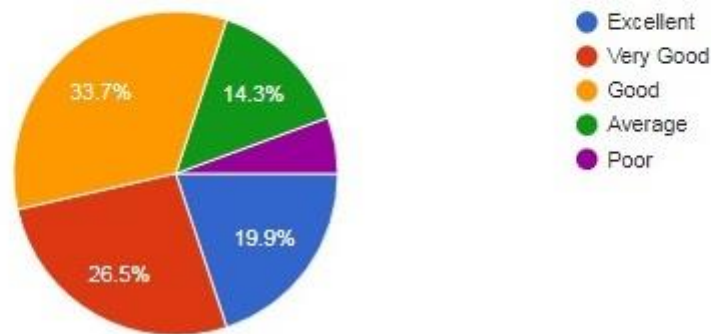

According 27.6 % students consider effective use of teaching aids by teachers while teaching very good.

According 30.6 % students consider effective use of teaching aids by teachers while teaching good.

According 11.2 % students consider effective use of teaching aids by teachers while teaching average.

According 2 % students consider effective use of teaching aids by teachers while teaching poor.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

According 19.9 % students consider effective use of academic , clinical & practical facilities available in the institution for better learning excellent.

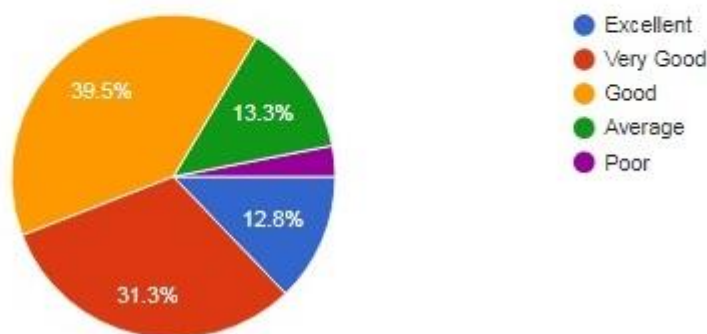

According 26.5 % students consider effective use of academic , clinical & practical facilities available in the institution for better learning very good.

According 33.6 % students consider effective use of academic , clinical & practical facilities available in the institution for better learning good.

According 14.3 % students consider effective use of academic , clinical & practical facilities available in the institution for better learning average.

According 6.6 % students consider effective use of academic , clinical & practical facilities available in the institution for better learning poor.

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

According 12.8 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development excellent.

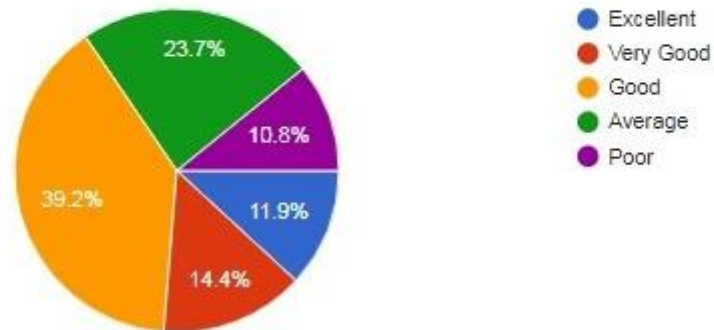

According 31.8 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development very good.

According 39.5 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development good.

According 13.3 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development average.

According 5 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development poor.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

According 11.9 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc excellent.

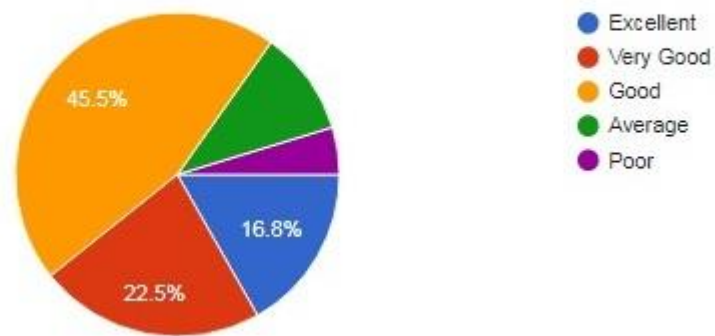

According 14.4 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc very good.

According 39.2 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc good.

According 23.3 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc average.

According 10.8 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research, etc poor.

7. The satisfaction about fairness in internal evaluation process.

According 16.8 % students consider the satisfaction about fairness in internal evaluation process excellent.

According 22.5 % students consider the satisfaction about fairness in internal evaluation process very good.

According 45.5 % students consider the satisfaction about fairness in internal evaluation process good.

According 9 % students consider the satisfaction about fairness in internal evaluation process average.

According 6 % students consider the satisfaction about fairness in internal evaluation process poor.

8 Actionable Suggestions Received

1. Some topics need revision before exams are conducted
2. Understanding topics difficult with online teaching. Offline classes should be conducted for the topics that have been conducted online.
3. Some classes are monotonous which makes them difficult to comprehend.
4. We are not able to decide which book to follow and how much to read as so many books and matter is available around.
5. We lack confidence in answering viva questions.

According 25 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc excellent.

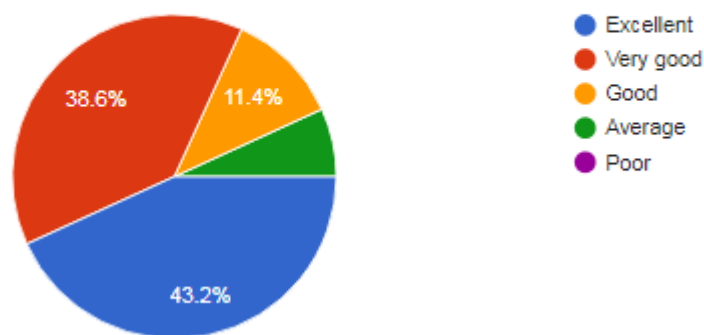

According 36.4 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc very good.

According 31.8 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc good.

According 3 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc average.

According 8 % teachers consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc poor

7. The satisfaction about fairness in internal evaluation process.

According 43.2 % teachers consider the satisfaction about fairness in internal evaluation process excellent.

According 38.6 % teachers consider the satisfaction about fairness in internal evaluation process very good.

According 11.4 % teachers consider the satisfaction about fairness in internal evaluation process good.

According 8 % teachers consider the satisfaction about fairness in internal evaluation process average.

8 Actionable Suggestions Received

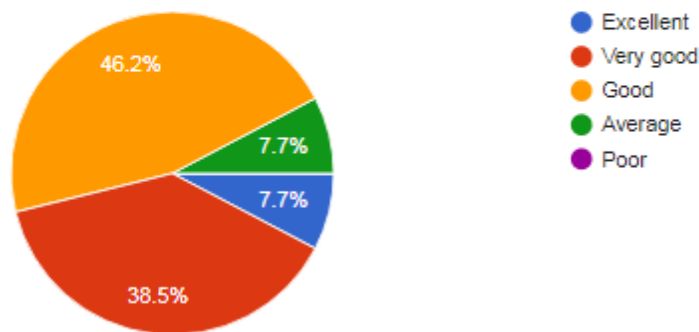

1. Learning process is taxing for some students rather than being enjoyable in online mode.
2. It becomes a little difficult to give live demonstration of procedure to each and every batch of students / intern posted.
3. There has to be a connection between theoretical aspect and practical aspect of a topic.

Analysis of Feedback by Alumni (2020-21)

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

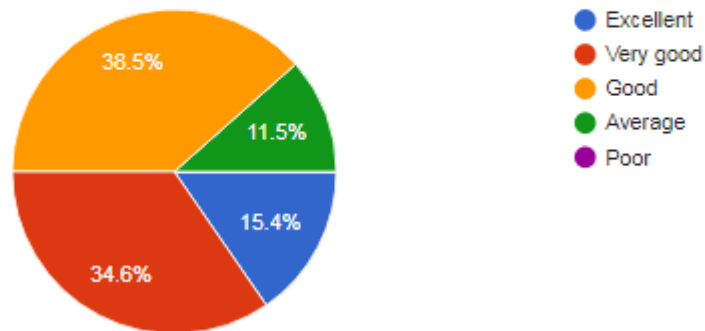

According 7.7 % alumni consider syllabus and curriculum is need based , relevant and has potential to be in present situation excellent.

According 38.5 % alumni consider syllabus and curriculum is need based , relevant and has potential to be in present situation very good.

According 46.2 % alumni consider syllabus and curriculum is need based , relevant and has potential to be in present situation good.

According 7.7 % alumni consider syllabus and curriculum is need based , relevant and has potential to be in present situation average.

2. Coverage of curricula and syllabi within time frame

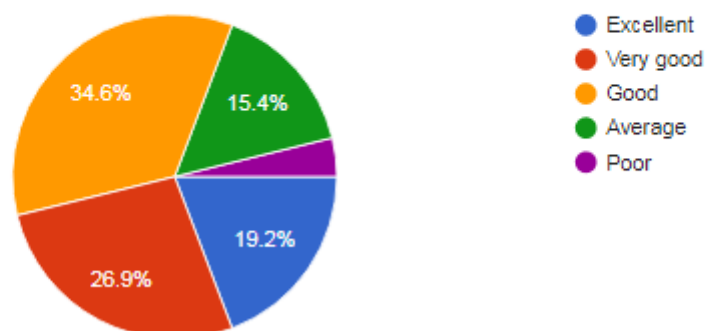

According 15.4 % alumni consider coverage of curricula and syllabi within time frame excellent.

According 34.6 % alumni consider coverage of curricula and syllabi within time frame very good.

According 38.5 % alumni consider coverage of curricula and syllabi within time frame good.

According 11.5 % alumni consider coverage of curricula and syllabi within time frame average.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

According 19.2 % alumni consider effective use of teaching aids by teachers while teaching excellent.

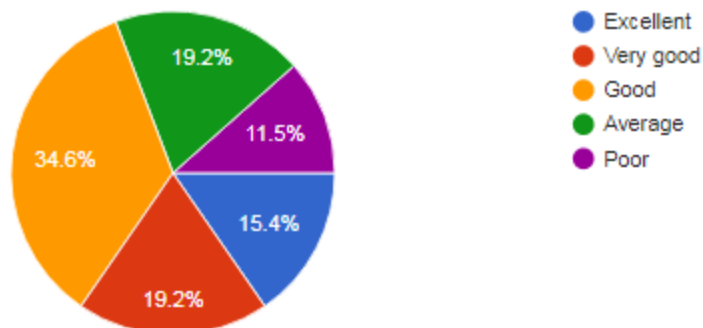

According 26.9 % alumni consider effective use of teaching aids by teachers while teaching very good.

According 34.6 % alumni consider effective use of teaching aids by teachers while teaching good.

According 15.4 % alumni consider effective use of teaching aids by teachers while teaching average.

According 4 % alumni consider effective use of teaching aids by teachers while teaching poor.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

According 15.4 % alumni consider effective use of academic , clinical & practical facilities available in the institution for better learning excellent.

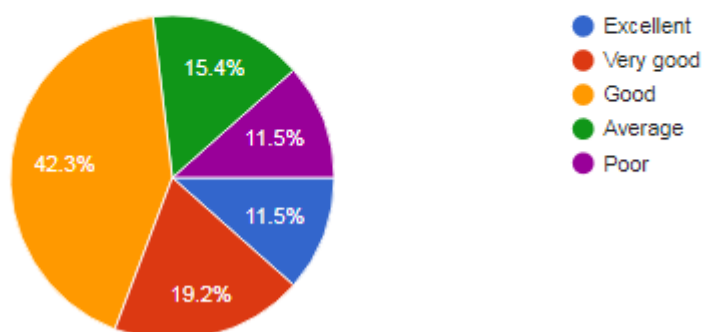

According 19.2 % alumni consider effective use of academic , clinical & practical facilities available in the institution for better learning very good.

According 34.6 % alumni consider effective use of academic , clinical & practical facilities available in the institution for better learning good.

According 19.2 % alumni consider effective use of academic , clinical & practical facilities available in the institution for better learning average.

According 11.5 % alumni consider effective use of academic , clinical & practical facilities available in the institution for better learning poor.

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

According 11.5 % alumni consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development excellent.

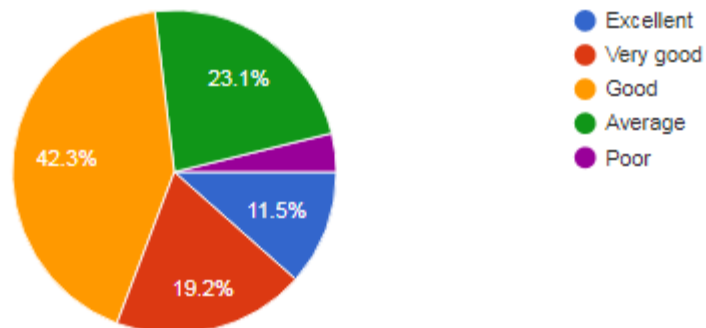

According 19.2 % alumni consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development very good.

According 42.3 % alumni consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development good.

According 15.4 % alumni consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development average.

According 11.5 % alumni consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development poor.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

According 11.5 % alumni consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc excellent.

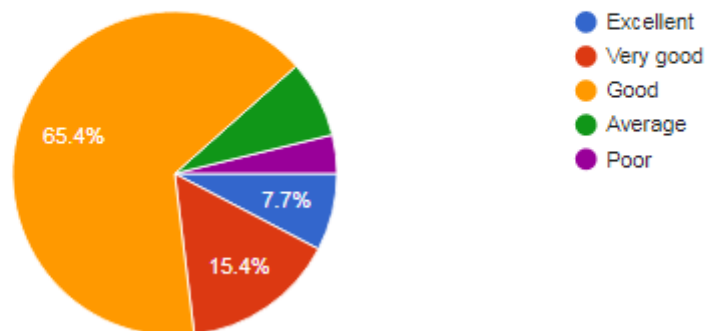

According 19.2 % alumni consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc very good.

According 42.3 % alumni consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc good.

According 23.1 % alumni consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc average.

According 7 % alumni consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc poor.

7. The satisfaction about fairness in internal evaluation process.

According 7.7 % alumni consider the satisfaction about fairness in internal evaluation process excellent.

According 15.4 % alumni consider the satisfaction about fairness in internal evaluation process good.

According 65.4 % alumni consider the satisfaction about fairness in internal evaluation process good.

According 7 % alumni consider the satisfaction about fairness in internal evaluation process average.

According 6 % alumni consider the satisfaction about fairness in internal evaluation process poor.

8 Actionable Suggestions Received

1. More research grants should be provided.
2. Clinical based learning should be encouraged.
3. Students are asked to do a few old fashioned treatments. Outer world scenario is quite different, so students should be competent enough to work there

Analysis of Feedback by Students (2019-20)

384 students out of 500 responded

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

According 20.3 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation excellent.

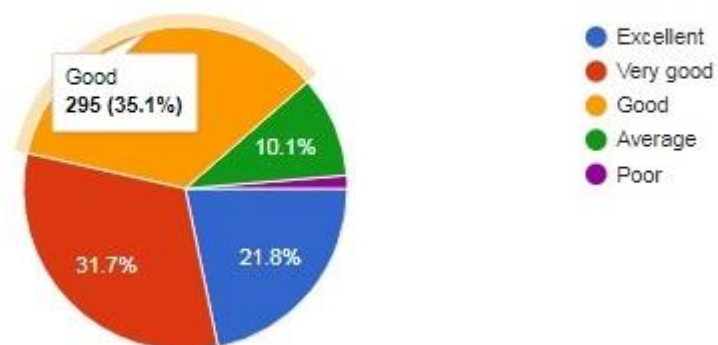

According 29.9 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation very good.

According 36.3 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation good.

According 11.4 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation average.

According 2 % students consider syllabus and curriculum is need based , relevant and has potential to be in present situation poor.

2. Coverage of curricula and syllabi within time frame

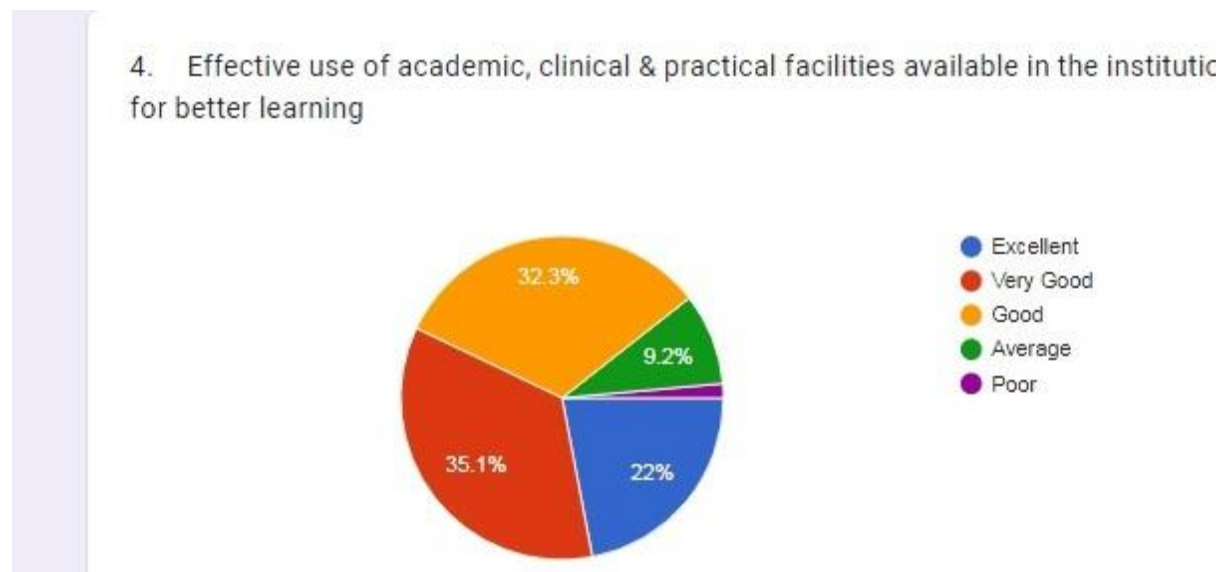

According 21.8 % students consider coverage of curricula and syllabi within time frame excellent.

According 31.7 % students consider coverage of curricula and syllabi within time frame very good.

According 35.1 % students consider coverage of curricula and syllabi within time frame good.

According 10.1 % students consider coverage of curricula and syllabi within time frame average.

According 2 % students consider coverage of curricula and syllabi within time frame poor.

According 22 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning excellent.

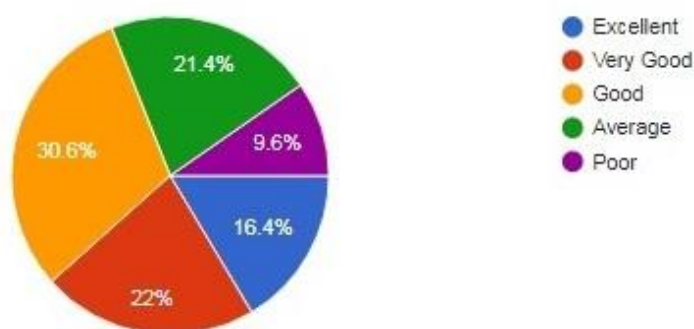

According 35.1 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning very good.

According 32.3 % students effective use of academic , clinical &practical facilities available in the institution for better learning good.

According 9.2 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning average.

According 2 % students consider effective use of academic , clinical &practical facilities available in the institution for better learning poor.

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

According 16.4 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development excellent.

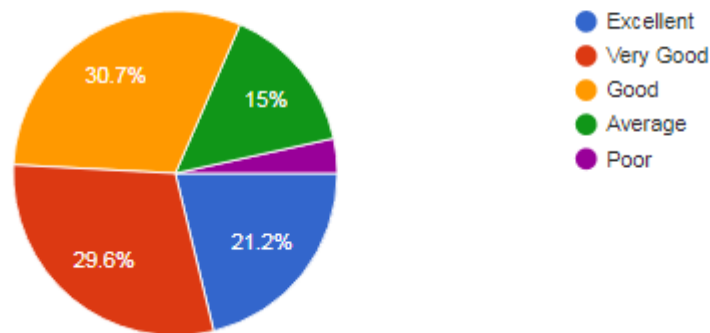

According 22 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development very good.

According 30.6 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development good.

According 21.4 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development average.

According 9.6 % students consider integration of additional lectures or trainings in addition to regular curriculum beneficial for academic, professional, social and personal development poor.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

According 21.2 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc excellent.

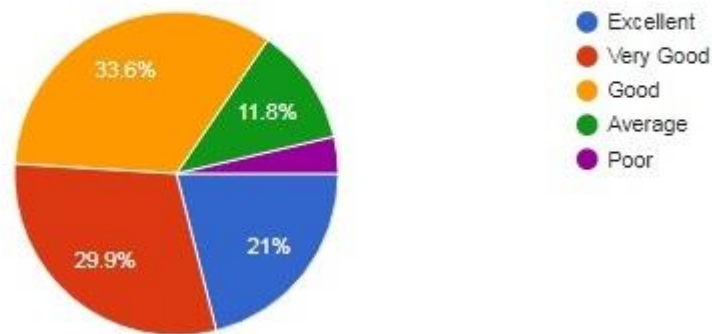

According 29.6 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc very good.

According 30.7 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc good.

According 15 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc average.

According 8 % students consider opportunities given for outdoor learning like community postings, study tour/visits, attending conferences, research,etc poor.

7. The satisfaction about fairness in internal evaluation process.

According 21 % students consider the satisfaction about fairness in internal evaluation process excellent.

According 29.9 % students consider the satisfaction about fairness in internal evaluation process very good.

According 33.6 % students consider the satisfaction about fairness in internal evaluation process good.

According 11.8 % students consider the satisfaction about fairness in internal evaluation process average.

According 7 % students consider the satisfaction about fairness in internal evaluation process poor.

8 Actionable Suggestions Received

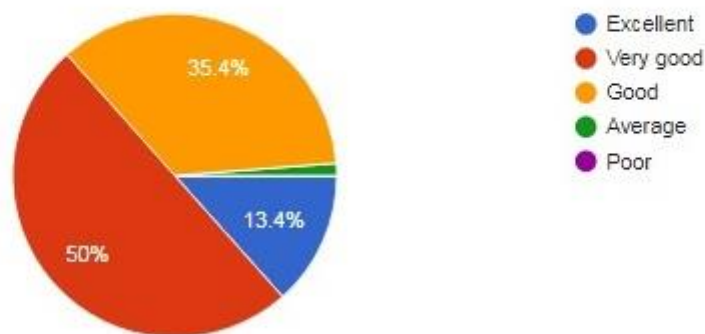

1. From clinical practice point of view , infection control should be given more stress and we should be taught about sterilization protocol in detail in pandemic scenario.
2. Lack of time for self study.
3. Sometimes concepts are difficult to understand in initial lectures since we are not used to newer dental terminologies.
4. Sometimes topic is covered in a hurry and we miss out on some important points.
5. In the department of Pharmacology topics like local anesthesia, antithyroid drugs, antianginal drugs and sympathomimetic drugs are difficult to learn.
6. We are unable to score good marks in MCQ's.

Sub:-Feedback Report from stakeholders (Students, Staff, Alumni, Professionals, Employers) on syllabus & curriculum

Actionable suggestions Received

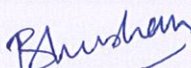

Academic Year 2018-19

Category	Actionable Suggestions received
Students	We should be allowed to do more number of clinical procedures like composite restorations and posterior RCT in final year and internship year
	There should be clinical demonstrations and permission for implant procedure for all students
	In Preclinical subjects, some chapters are difficult to comprehend
	Sometimes we do understand the topic but answering the questions in exam point wise and in detail becomes difficult. We are unable to understand how to attempt an answer or how much time should be allotted to each question
	Difficulty in understanding Neuroanatomy. General anatomy lectures

	should be made more interactive
Teachers	Practical based teaching or teaching practical situation based topics should be given more importance.
	There should be correlation between theory taught in classes and the practical application for all preclinical and clinical subjects
	Strategic planning and action for slow and advanced learners necessary
Alumni	Communication skills should be given due attention
	Emergency situation handling should be taught
	Periodontal surgeries should be allowed to students
	Sterilization protocol should be officially added in the curriculum

Action Taken on Feedback From Students

Mahatma Gandhi Vidyamandir's
Karmaveer Bhausaheb Hiray Dental College & Hospital
Panchavati, Nashik-422003

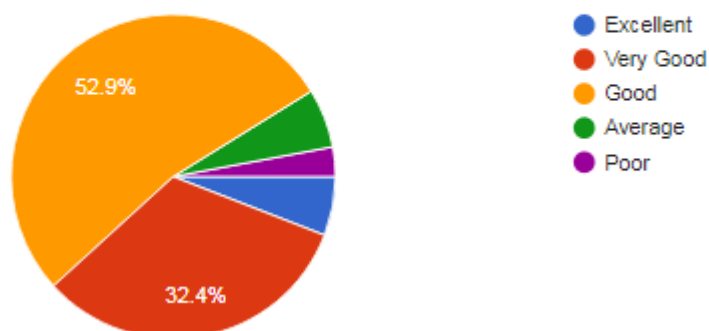

Action Taken for academic year 2022-23

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

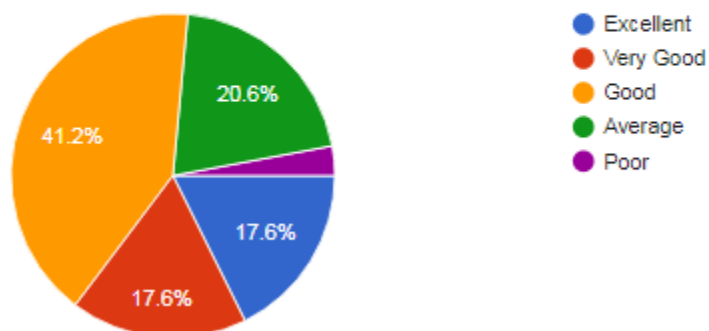

Action Taken- Problem based sessions continue, evidence based approach continues. Handling of Emergency situations is demonstrated. Use of advanced methods is introduced to internship students.

2. Coverage of curricula and syllabi within time frame

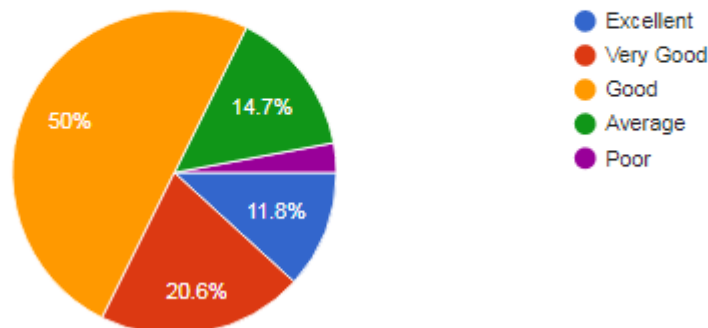

Action Taken-Overall statistics seem satisfactory. Staff members were appreciated by the Principal for the same.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

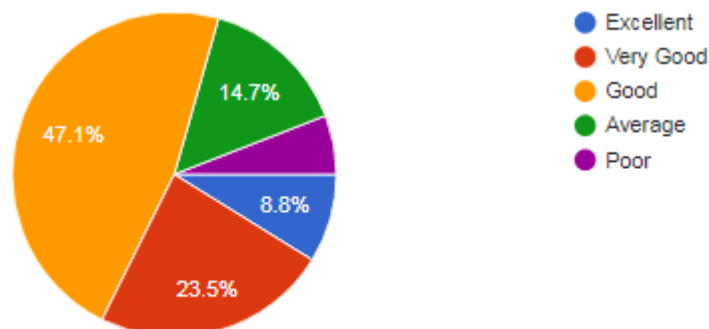

Action Taken- Workshop conducted for staff to learn various interactive methods. Planned more such workshops for teaching staff.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

Action Taken-Advanced Dentistry as a course started. RVG, OPG,LASERS, Microscope and all new equipment used by interns, PGs.

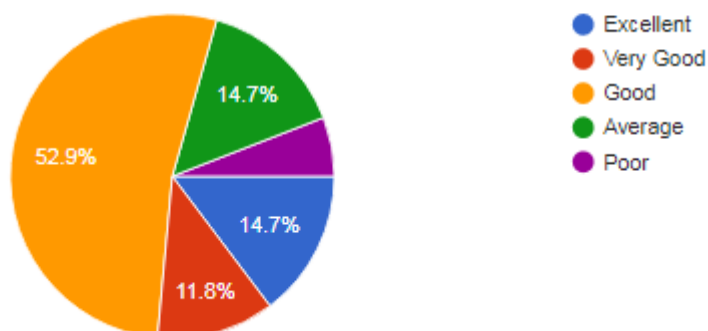

5. Integration of additional lectures or trainings in addition to regular curriculum (like current issues, professional development, interdepartmental activities etc.) beneficial for academic, professional, social and personal development.

Action Taken- 14.7% of students think that the integration of various courses which may prove beneficial for academic, professional, social and personal development is average rated. We intend to focus on this group . For that we plan to focus ourselves in planning for cross cutting issues like gender,human values,health determinants, ethics and demographic

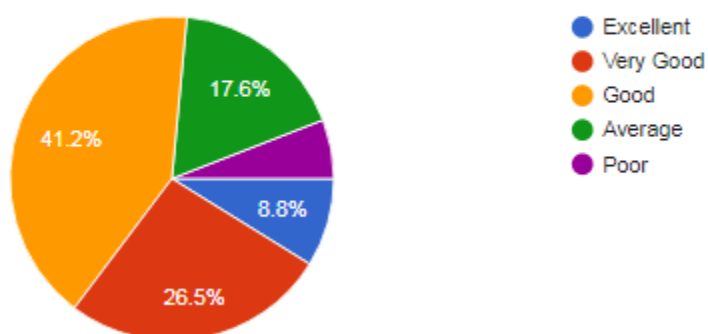

For value added courses we determine to concentrate on language development, computers, communication skills and also law application in medical and dental practise. For add on courses we intend to initiate classes like diet and nutrition for 1st year, infection control for 2nd year, medical emergencies for 3rd year and advanced dentistry for 4th year and practice management for interns.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

Action Taken- Over all statistics seem satisfactory

7. The satisfaction about fairness in internal evaluation process.

Action Taken-All staff members reminded to follow assessment pattern as defined by the university and institution. Continuous internal evaluation done as per desired competencies and attributes. OSPE and OSCE methods of evaluation are implemented

8)

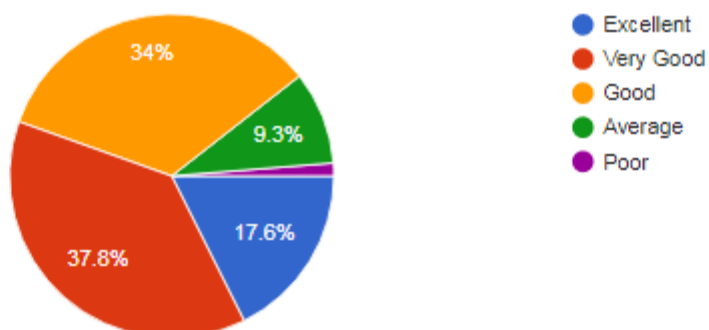

Category	Actionable Responses received	Action taken
Students	Newer technologies should be taught and allowed to use.	Advanced Dentistry as a course started. RVG, OPG,LASERS, Microscope and all new equipment used by interns, PGs.
	Lack of time for self study	Students were encouraged to be more disciplined and organized as far as studies were concerned. Guidance sessions conducted for the same.
	Teachers should make class more interactive	Staff asked to make lectures more interactive by using various teaching aides.
	Lectures should be interactive	Workshop conducted for staff to learn various interactive methods. Planned more such workshops for teaching staff.

Action Taken for academic year 2021-22

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

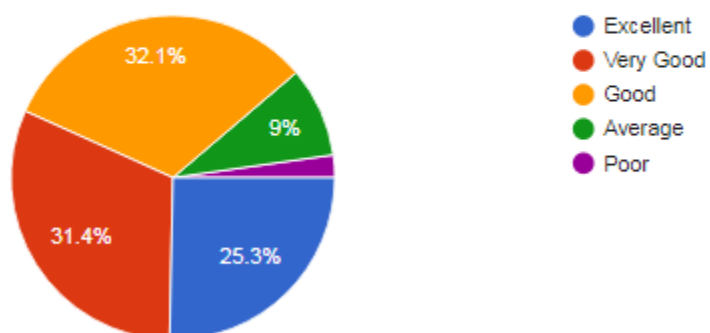

Action Taken-Overall statistics seem satisfactory

2. Coverage of curricula and syllabi within time frame

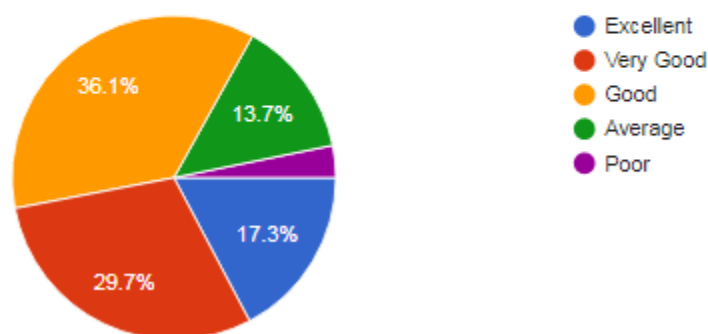

Action Taken- Overall statistics seem satisfactory. In the academic meeting the staff members were appreciated for the effort they are putting in to cover the whole syllabus well within time.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

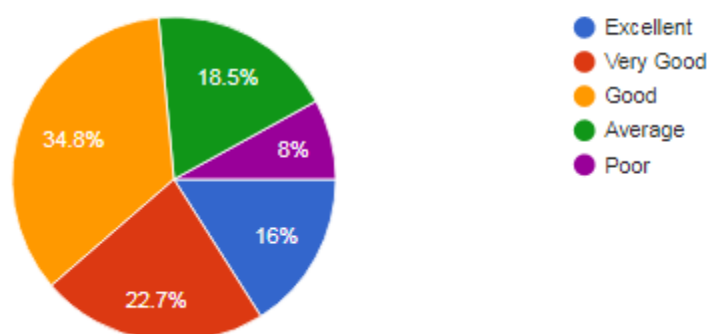

Action Taken- Majority of students do think that teaching aids are effectively used by teachers while teaching. 9% of the students disagree with the same. We have focused on this group. So as measures to be taken for this issue staff has been asked to make lectures more interactive by using various teaching aides. Workshop conducted for staff to learn various interactive methods. Planned more such workshops for teaching staff.

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

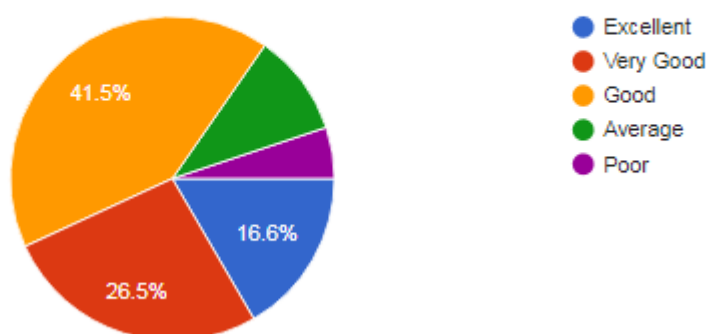

Action Taken- 13.7% students have voted average rating for integration of various courses. We tend to focus on this group . Soft skills and communication skills classes continue. Students will be assessed in the department for their interpersonal skills.Report and update on the progress of this criteria will be discussed in next curriculum committee meeting.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

Action Taken- 18.5% have voted average and 8% have voted poor in regards to opportunities given for outdoor learning . We decide to focus on this group . Students are motivated to attend more conferences local as well as distant ones. Students are encouraged to take up short studies and research projects. Guidance courses are arranged and organised by the institution to guide students to methodology of research and studies. Incentives are arranged to encourage and motivate students further.

7. The satisfaction about fairness in internal evaluation process.

Action Taken- All staff members reminded to follow assessment pattern as defined by the university and institution.

8)

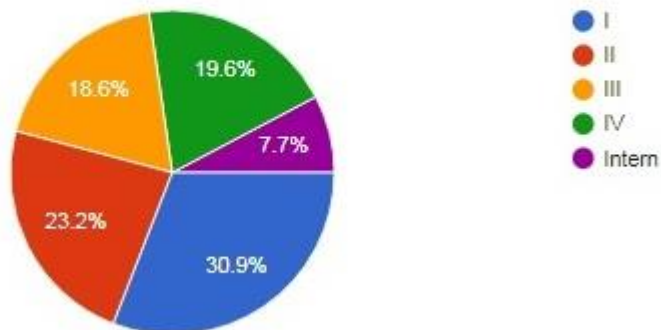

Category	Actionable Responses received	Action taken
Students	Do invite more alumni to have interactive session for guidance	More frequent alumni interactions planned by the institute at regular intervals on various topics.
	Classrooms should be better equipped with teaching aids and lectures should be interactive	Staff asked to make lectures more interactive by using various teaching aides. Workshop conducted for staff to learn various interactive methods. Planned more such workshops for teaching staff.
	Some classes run very fast which makes it difficult for us to understand.	Teaching staff is instructed and trained to evaluate the rate of understanding of each batch. Small group teaching is encouraged.

Action Taken for academic year 2019-20

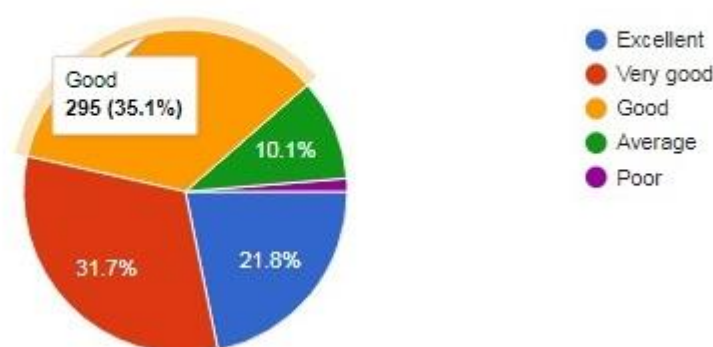

384 students out of 500 responded

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

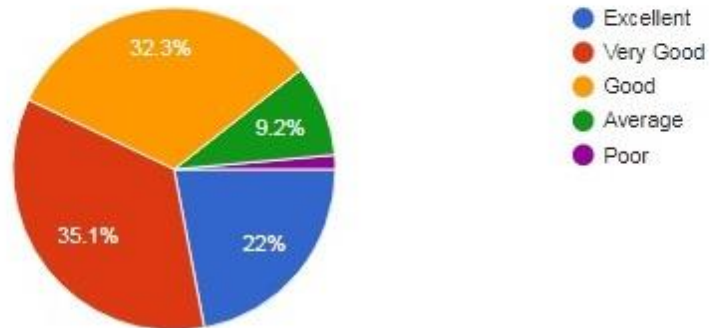

Action Taken-Though majority of students voted for the syllabus and curriculum to be excellent to good to be need based , relevant and has potential to be applicable in present situation, it was decided that we should imply more simple yet effective methods.

2. Coverage of curricula and syllabi within time frame

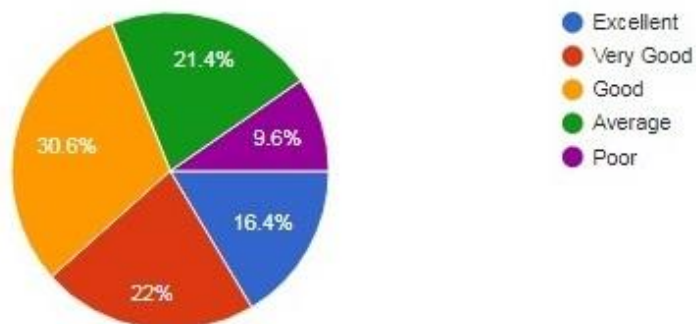

Action Taken- According to the received data from responses syllabus is covered well within time frame . All the departments are notified to stick to the schedule and time table strictly so that this criteria is met every time.

4. Effective use of academic, clinical & practical facilities available in the institutio
for better learning

Action Taken- Although the responses of students show that the facilities available in the institute for better learning are used effectively well , it will be moral duty of the institute to strive more for the betterment of student learnings by providing new and advanced facilities.

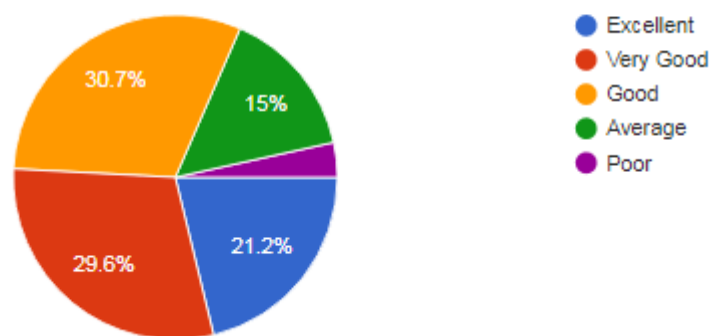

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

Action Taken- 9.6% of students think that the integration of various courses which may prove beneficial for academic, professional, social and personal development is not satisfactory. We intend to focus on this group . For that we plan to focus ourselves in planning for cross cutting issues like gender, human values, health determinants, ethics and demographic

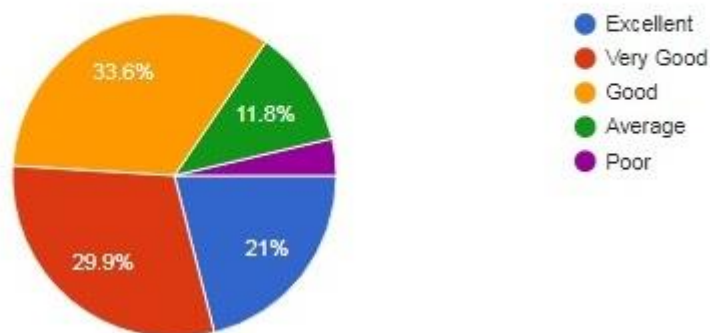

For value added courses we determine to concentrate on language development, computers, communication skills and also law application in medical and dental practise. For add on courses we intend to initiate classes like diet and nutrition for 1st year, infection control for 2nd year, medical emergencies for 3rd year and advanced dentistry for 4th year and practice management for interns.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

Action Taken- Over all statistics seem satisfactory

7. The satisfaction about fairness in internal evaluation process.

Action Taken -11.8% students find internal evaluation system average. Internal assessment is necessary to evaluate progress of students . The evaluation has to be done strictly and exactly on time.

8)

Category	Actionable responses received	Action taken
Students	From clinical practice point of view , infection control should be given more stress and we should be taught about sterilization protocol in detail in pandemic scenario	Sterilization and Infection Control continues as a course for BDS students. Workshop also conducted along with Orientation program every year. Infection control measures included in all the dental procedures wherever necessary
	Lack of time for self study	Students were encouraged to be more disciplined and organized as far as studies were concerned. Guidance sessions conducted for the same.
	Sometimes concepts are difficult to understand in initial lectures since we are not used to newer dental terminologies	Students informed about the next topic to be covered beforehand and are asked to read the topic from textbook before they come to attend the class. Revision classes taken. Videos shown of related clinical procedures for better understanding.
	Sometimes topic is covered in a hurry and we miss out on some important points	Staff instructed to conduct lectures in detail. After the lecture ends the staff is asked to stay in class compulsorily for minimum 10 minutes for doubt solving purpose. Departments are asked to make a survey about the topics that students need to revise and likewise revision should be conducted.
	In the department of Pharmacology topics like local anesthesia, antithyroid drugs,	Innovative tools like videos, animation included in lectures. Topics revised , later reinforced by measures like

	antianginal drugs and sympathomimetic drugs are difficult to learn	informing clinical significance, seminars, group discussions and regular tests.
	We are unable to score good marks in MCQ's.	MCQ practice undertaken for each topic and MCQs question bank made available to students

Teachers	Situation is crucial when fixed curriculum applied to students with varying needs, as all students are not the same.	Advanced learners, slow learners are identified. Separate sessions conducted. Small group teachings, seminars, discussions, revision lectures conducted throughout the year.
	The limited exposure in learning makes a huge gap between what is required from students and what knowledge they possess to tackle concerns.	Problem based sessions continue, evidence based approach continues. Handling of Emergency situations is demonstrated,.

Action Taken for academic year 2018-19

Category	Actionable suggestions received	Action taken
Teachers	There should be correlation between theory taught in classes and the practical application for all preclinical and clinical subjects	Problem based teaching continues. Case reports/presentation are shown in the lectures. Students are shown all the dental materials and procedures (video or live) which are part of their syllabus. Students also present cases and learn. . All students are allowed to make tour of clinics after the lecture where they can see the practical procedures.
	Strategic planning and action for slow and advanced learners necessary	Slow and advanced learners are sorted out from every batch and various methods of helping their academic progress are undertaken

Action taken report for Teachers Feedback

Category	Actionable Responses received	Action taken
2022-23	Majority teaching staff members voted positive for effectiveness of teaching experience process.	The Principal noted and appreciated the positive feedback.
	Senior staffs should be involved in the process of curriculum setting	Suggestions from senior faculty taken into account for curriculum management. Limitations are that institution has to follow curriculum given by DCI and MUHS.
	More practical based and advanced methods of clinical practices should be promoted.	Problem based sessions continue, evidence based approach continues. Handling of Emergency situations is demonstrated. Use of advanced methods is introduced to internship students
	Elaborative assessment and evaluation is needed	Continuous internal evaluation done as per desired competencies and attributes. OSPE and OSCE methods of evaluation are implemented
2021-22	Majority of the staff members are of the view that the coverage of curriculum and syllabi is done well within time frame.	The staff members are appreciated by the Principal
	Need to encourage more group	Interactive teaching, short span teaching recommended. Dental quizzes are advised

	discussion	to organize. Small group discussions are suggested. Value added courses art of public speaking to be conducted.
	Pattern of assessment of the students should be modified	All staff members reminded to follow assessment pattern as defined by the university and institution
	More practical based and advanced methods of clinical practices should be promoted.	Problem based sessions continue, evidence based approach continues. Handling of Emergency situations is demonstrated. Use of advanced equipment strictly followed for internship students. Value added courses like artificial intelligence in dentistry, diagnostic aids in dentistry are planned to be conducted.
	Soft skill development should be given importance	Soft skills and communication skills classes continue. Students are assessed in the department for their interpersonal skills
2020-21	Effective use of teaching aids and academic , clinical and practical facilities available in the institution for better learnig is very good.	Co operation from institution is noted and appreciated.
	8% of teachers are of the view that outdoor learning opportunities are presented poorly.	We decide to focus on this group . Teacherss are motivated to attend more conferences local as well as distant ones. Teachers are encouraged by providing incentives for studies and research projects. Guidance courses are arranged and organised by the institution to guide teachers to methodology of research and studies.
	Learning process is taxing for some students rather than being enjoyable	Interactive teaching, short span teaching recommended. Dental quizzes are advised

	in online mode	to organize
	It becomes a little difficult to give live demonstration of procedure to each and every batch of students / intern posted	Recorded demonstration of all procedures advised to be arranged in the departments
	There has to be a connection between theoretical aspect and practical aspect of a topic.	After the end of lecture students are taken to the clinical section to show the steps being done practically by PGs or interns
2019-20	2% of the teachers are of the opinion that finishing of curricular within time frame and effective use of teaching aids is poor.	We intend to maintain the teaching aids that are already present in the institution in good form and shape and along with that to introduce more advanced aids if and when needed.
	Situation is crucial when fixed curriculum applied to students with varying needs, as all students are not the same.	Advanced learners, slow learners are identified. Separate sessions conducted. Small group teachings, seminars, discussions, revision lectures conducted throughout the year.
	The limited exposure in learning makes a huge gap between what is required from students and what knowledge they possess to tackle concerns.	Problem based sessions continue, evidence based approach continues. Handling of Emergency situations is demonstrated,.
2018-19	There should be correlation between theory taught in classes and the practical application for all preclinical and clinical subjects	Problem based teaching continues. Case reports/presentation are shown in the lectures. Students are shown all the dental materials and procedures (video or live) which are part of their syllabus. Students also present cases and learn. . All students are allowed to make tour of clinics after the lecture where they can see the practical procedures.

	Strategic planning and action for slow and advanced learners necessary	Slow and advanced learners are sorted out from every batch and various methods of helping their academic progress are undertaken

Karmaveer Bhausaheb Hiray Dental College & Hospital
Panchavati, Nashik-422003

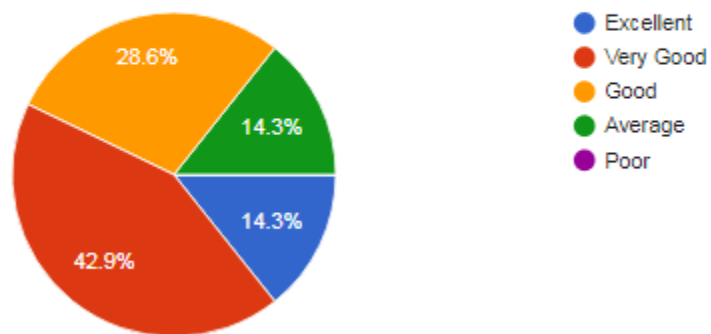

Action Taken for academic year 2022-23

1. New ideas and knowledge promoted in the institute

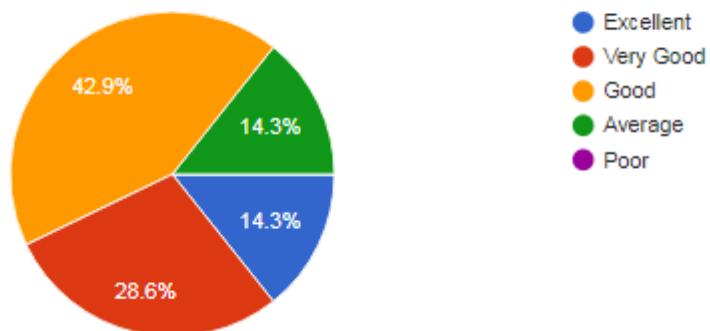

Action Taken- Over all statistics seem satisfactory.

2. Inclusion of contemporary techniques and sciences in teaching & learning

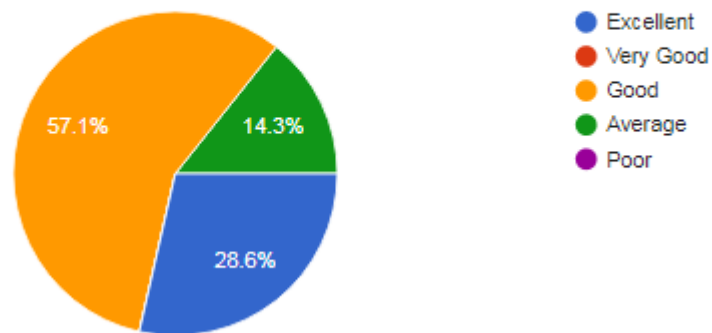

Action Taken- Over all statistics seem satisfactory.

3. Relevance of syllabus and curriculum in current clinical field

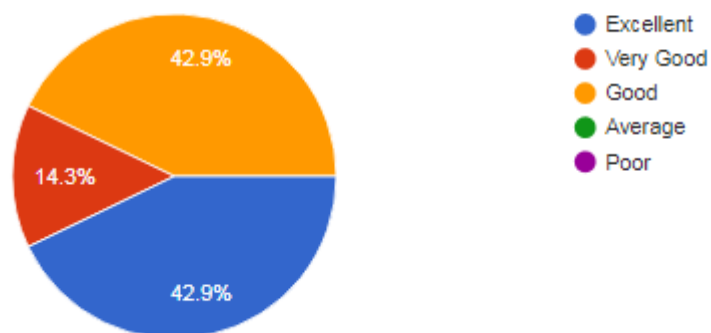

Action Taken- Problem based sessions continue, evidence based approach continues.
Handling of Emergency situations is demonstrated.

4. Role of curriculum in developing Diagnostic skills and clinical decision making

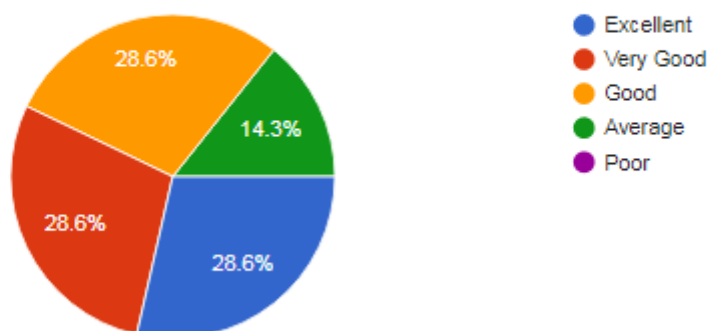

Action Taken-Clinical cases are taught in detail by departments in lectures and during postings.

5. Development of allied skills for communication, integrity, ability to work as team etc.

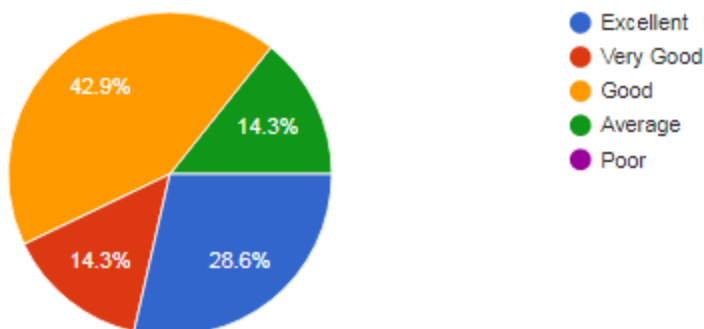

Action Taken- Over all statistics seem satisfactory.

6. Nurturing multidisciplinary approach and Response to emergency handling

Action Taken-14.3% of Alumni are of the view that multidisciplinary approach and emergency handling are managed averagely in the institution. We intend to focus on this group. BLS and Management of medical Emergencies continues as a course for students. Handling of Emergency situations is demonstrated.

7. Effective training mounting into research potential

Action Taken-14.3% of Alumni are of the view that effective training mounting into research potential are managed averagely in the institution. Students are motivated to attend more conferences local as well as distant ones. Students are encouraged to take up short studies and research projects. Guidance courses are arranged and organised by the institution to guide students to methodology of research and studies. Incentives are arranged to encourage and motivate students further.

Action Taken for academic year 2020-21

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

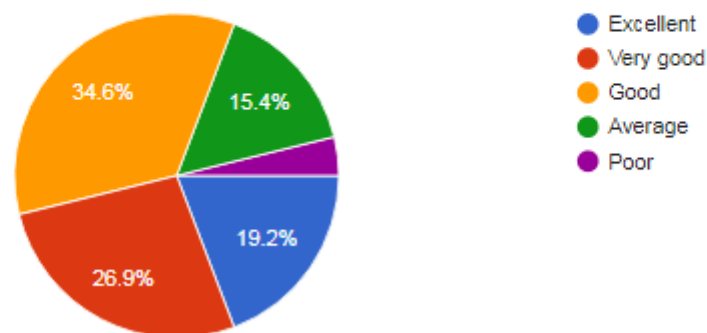

Action Taken-Overall statistics seem satisfactory.

2. Coverage of curricula and syllabi within time frame

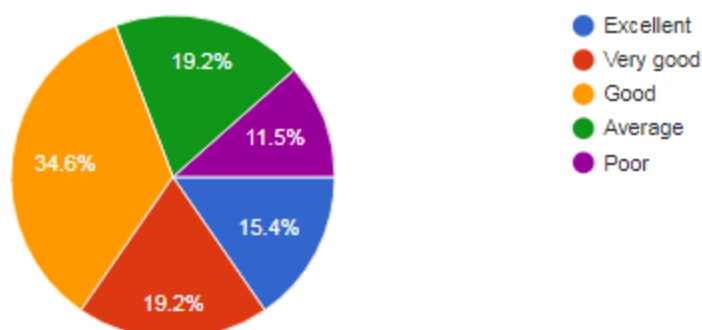

Action Taken-Overall statistics seem satisfactory.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

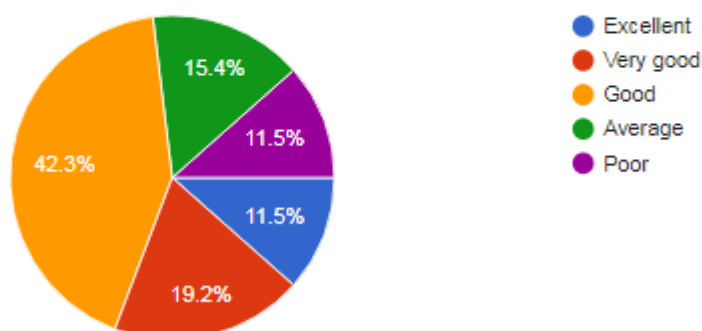

Action Taken-Overall statistics seem satisfactory.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

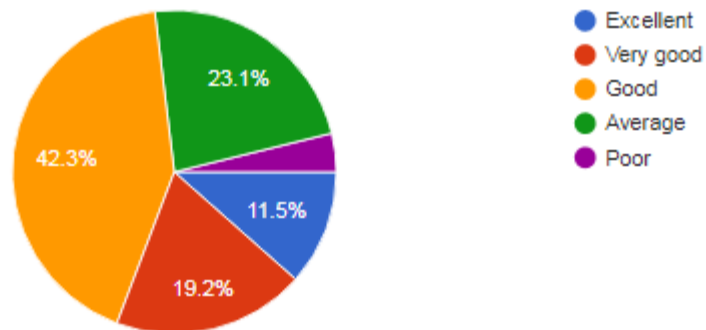

Action Taken- 11.5% of alumnis are of the view that academic,clinical and practical facilities available in institute for better learning are poor in usage. Hence the institute will strive more for the betterment of student learnings by providing new and advanced facilities.

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

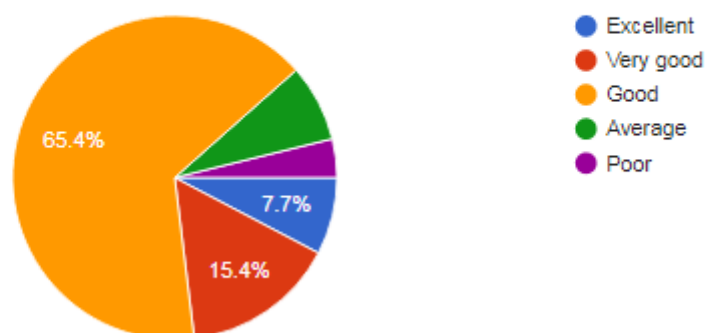

Action Taken- 11.5% of alumni are of view intergration courses are poorly sufficient. For value added courses we determine to concentrate on language development, computers, communication skills and also law application in medical and dental practise. For add on courses we intend to initiate classes like diet and nutrition for 1st year, infection control for 2nd year, medical emergencies for 3rd year , advanced dentistry for 4th year and practice management for interns.

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

Action Taken-Overall statistics seem satisfactory.

7. The satisfaction about fairness in internal evaluation process.

Action Taken-Overall statistics seem satisfactory.

8)

Category	Actionable responses received	Action Taken
Alumni	More research grants should be provided	Seminars for Research grants organized. Research committee working on improving research quality and getting grants. Students are encouraged for research studies. Guidance provided through Research committee, Ethics committee.
	Clinical based learning should be encouraged	Clinical cases are taught in detail by departments in lectures and during postings. Case presentations, Case based lectures, Problem based teaching continues.
	Students are asked to do a few old fashioned treatments. Outer world scenario is quite different, so students should be competent enough to work there.	Students learn conventional as well as contemporary dentistry. Additional value added and subject related courses continue. CDEs arranged for knowledge upgradation. Advanced Dentistry taught and practiced. Continuous and strict assessment done. Additional postings outside college premises encouraged.

Action Taken for academic year 2019-20

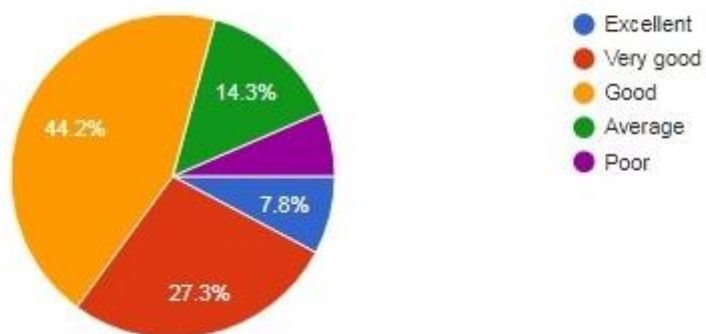

1. Syllabus and curriculum is need based, relevant and has potential to be applicable in present situation

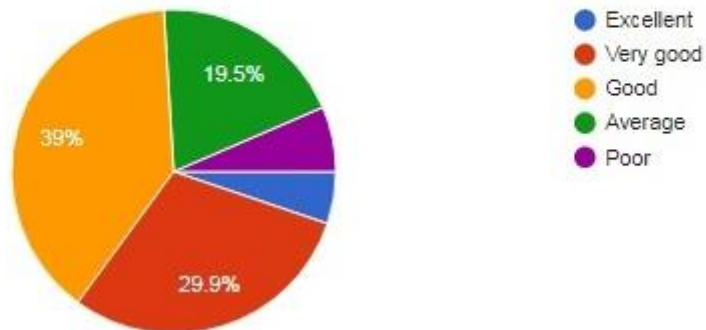

Action Taken-Over all statistics seem satisfactory.

2. Coverage of curricula and syllabi within time frame

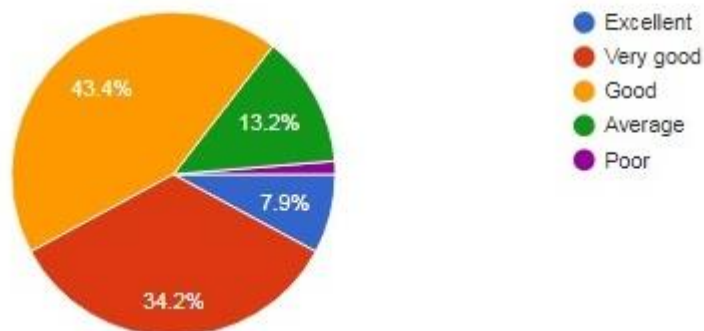

Action Taken-Overall statistics were satisfactory.

3. Effective use of teaching aids by teachers (video presentation, Power point presentation and other internet sources) while teaching

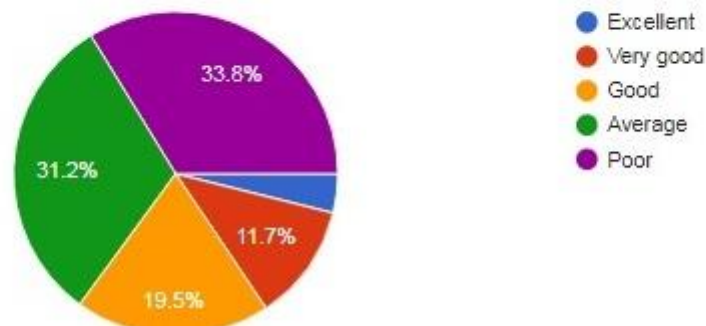

Action Taken- Overall statistics seem satisfactory. We intend to maintain the teaching aids that are already present in the institution in good form and shape and along with that to introduce more advanced aids if and when needed.

4. Effective use of academic, clinical & practical facilities available in the institution for better learning

Action Taken-Overall statistics were satisfactory

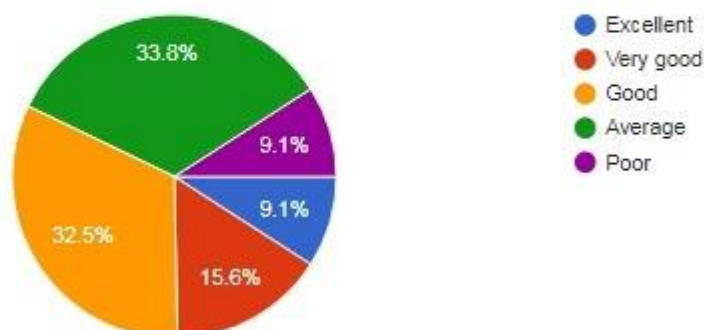

5. Integration of various courses/trainings (cross cutting issues, value added, add on, interdepartmental etc.) beneficial for academic, professional, social and personal development.

Action Taken- Taken- 33.8% of Alumni were of the view that the integration of various courses which may prove beneficial for academic, professional, social and personal development is not satisfactory. We intend to focus on this group. For that we plan to focus ourselves in planning for cross cutting issues like gender, human values, health determinants, ethics and demographic

For value added courses we determine to concentrate on language development, computers, communication skills and also law application in medical and dental practise. For add on courses we intend to initiate classes like diet and nutrition for 1st year, infection control for 2nd year, medical emergencies for 3rd year, advanced dentistry for 4th year and practice management for interns.

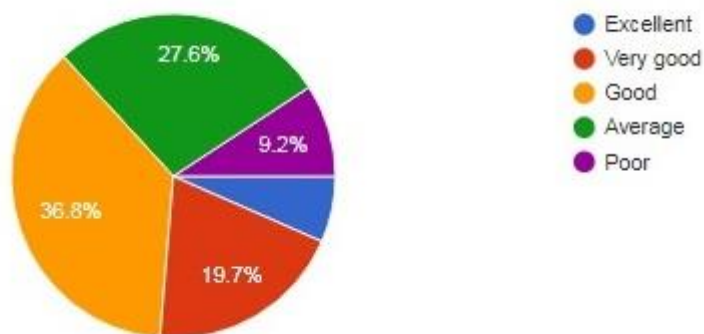

6. Opportunities given for outdoor learning like community postings, study tours/visits, attending conferences, research etc.

Action Taken-33.8% alumni are of view that opportunities for outdoor learning are average while 9.1% think it's poor. We intend to improve this number by motivating students to participate more in conferences and CDE's. Department of community dentistry is organising

field trips and visits to outdoor locations. Research committee is instructed to encourage students to take up short studies and research topics. Incentives will be granted to students for research and publications.

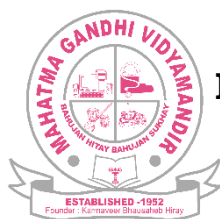

7. The satisfaction about fairness in internal evaluation process.

Action Taken- It has been instructed to the staff members that internal assessment evaluation has to be done with utmost precision. This point will be discussed in next departmental meetings of curriculum committee.
